

Paul J. Regan

Biography

Paul J. Regan is Vice President of Finance & Business Operations and Chief Financial Officer for Lockheed Martin Space Systems Company. Space Systems is an \$8 billion enterprise that employs approximately 15,000 people. The company provides advanced technology systems for national security, civil, and commercial customers. Chief products include major satellite systems; human space flight systems; strategic and missile defense systems; space observatories and interplanetary spacecraft; and a range of sensing, communications, and exploration payloads.

Previously, Regan was the Vice President of Finance & Business Operations for the Information Systems and Global Solutions (IS&GS) Business Area of Lockheed Martin, headquartered in Gaithersburg, MD. Regan also operated as Deputy to the Chief Financial Officer and was responsible for leading the business operations functions for IS&GS.

Over the past 20 years, Regan has been assigned to multiple locations within Lockheed Martin Corporation. Previous to his role at IS&GS, he was the Director of Business Operations for the Global Communications Systems line of business in the Space Systems Business Area. Prior to that, Regan was the Director of Business Management for the Coast Guard line of business at Maritime Systems and Sensors. He also worked with Lockheed Martin Systems Integration Owego as Director of the Aerospace line of business.

Regan's educational experience includes a master's degree in business administration from Cornell University and a bachelor's of science from Rochester Institute of Technology.
